Coffee Filter Art

You will need:

- plain white coffee filters (or plain white paper towels)
- washable markers
- water
- cookie sheets or table cover or newspapers

Directions:

1. Get a cookie sheet to be your work surface or cover a table with newspaper or some other protective cover. Lay out several plain white coffee filters and flatten them. If you don't have plain white coffee filters, try this craft with plain white paper towels.
2. Draw designs on the coffee filters or paper towels with washable markers. It's okay to leave some spots white. When you are finished drawing, use your fingers to dab water on the filters. You can even use a paint brush or baster to dab on water, or use a spray bottle to mist the filters. Watch the colors spread and blend! Let your coffee filter art dry. Then hang your creations in a window like sun catchers, or, use them for other crafts. Have fun!
